

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Our son and Daughter in law lost their jobs when the paper mill closed in Lock Haven Pa.

The only way we can communicate is by phone since they had to move to Virginia to find work. My wife and I are retired and on a fixed income. As we all know our benefits are in no way keeping up with the economy. So I ask you to please keep this in mind when this is brought up for vote.

Thank you Mr. and Mrs. Moore
